

TITLE SLIDE

LocalLoop

Your business knows what happened. Your AI copilot tells you what to do next.

HackerVilla Nainital |

Theme - 05 | Smart Living & Connected Communities

NEST - Tamanna, Keshav, Ansh and Gungun

THE PROBLEM

Millions of transactions. Very few actionable insights.

The Gap

Small merchants have digital payment data but lack analysts, marketing expertise, and time to act.

The Cost

Weak sales patterns go unnoticed, repeat customers disappear, growth opportunities are missed.

The Insight

The problem isn't lack of data — it's lack of decisions.

- ❏ Ravi's Chai Corner: 500+ monthly digital transactions — but Ravi doesn't know why Tuesday sales fall, which products drive repeats, or when customers are most active.

THE INSIGHT

**Small merchants don't need
another analytics dashboard.
They need a business
partner.**

Traditional Dashboards

"Here is your data."

Charts, tables, and numbers —
with no indication of what to
do next.

LocalLoop

"Here is what your data means —
and here is what you should do
next."

Core principle: AI should reduce
decision-making effort, not
increase it.

THE SOLUTION

Meet LocalLoop — an AI Growth Copilot for merchants.

Understand

AI analyzes transaction patterns, timing, and customer behavior

Recommend

AI identifies growth opportunities and generates personalized actions

Act

Merchant approves campaigns and LocalLoop measures results

Example insight: "Tuesday evening sales are 28% below average. Launch a ₹99 student combo from 4–7 PM to drive engagement."

HOW IT WORKS

From transaction to action in seconds.

01 **Ingest**

Relevant merchant business signals

02

Understand

AI identifies patterns, timing, and anomalies

03

Find Opportunity

Detects growth, retention, or operational gaps

04

Recommend

Generates simple explanation and suggested action

05

Act + Learn

Merchant approves; LocalLoop measures outcome

AI that explains, recommends, and learns.

Data Layer

Pattern detection,
feature
engineering,
anomaly
identification

AI Engine

LLM-powered
recommendations
with explainability

Feedback Loop

Learns from
merchant actions
and campaign
outcomes

Stack

React/Next.js · Node.js · MongoDB/PostgreSQL · Cloud

① MVP uses synthetic/demo merchant data. Production would integrate with authorized Paytm merchant data APIs.

WHY LOCALLOOP

Why LocalLoop?

Action over Analytics

Don't show charts — tell merchants exactly what to do.

Built for Small Merchants

Simple language, not complicated BI dashboards.

Human-in-the-Loop

AI recommends; the merchant remains in control.

Learns from Outcomes

Recommendations improve based on real campaign results.

LocalLoop turns business intelligence into business action.

IMPACT

Make every transaction more useful.

For Merchants

Better sales decisions, targeted promotions, higher repeat engagement, less time analyzing

For Customers

More relevant offers and better shopping experiences

For Paytm

Deeper merchant engagement, stronger ecosystem, new AI-powered services

BUSINESS MODEL

From payment infrastructure to merchant intelligence.

Proposed Business Model

1

Freemium

Basic insights for all merchants

2

Pro

Advanced AI recommendations & campaign generation

3

Premium

Forecasting, segmentation, automation & deep intelligence

4

Paytm Ecosystem

Cross-sell across all merchant services

□ *Proposed model. LocalLoop increases Paytm's value beyond payments — helping merchants understand and grow their business.*

Start small. Prove growth. Scale to millions.

Current MVP

- Synthetic data & merchant dashboard
- AI insights & opportunity detection
- Personalized recommendations
- Human approval workflow

Future Roadmap

- **Phase 2**
Real merchant integrations
- **Phase 3**
Automated campaign execution
- **Phase 4**
Predictive business planning
- **Phase 5**
Autonomous AI merchant teammate

Every merchant already has a story hidden in their transactions. LocalLoop helps them understand it — and act on it.
LocalLoop: Your AI business partner, not another dashboard.
